

4insight® Data Analytics

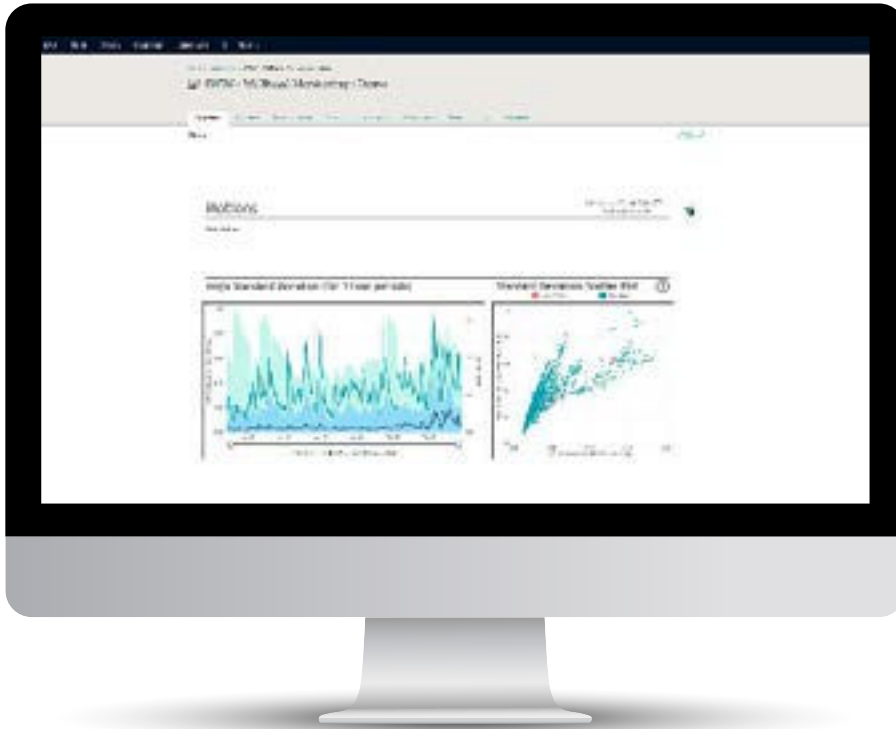

Enabling data-driven engineering and decision support

Maximise lifetime of assets, reduce operational cost and optimise future projects by empowering your engineers to share insight on 4insight®

4insight® is an industry platform for oceanspace empowering engineers to create and distribute decision support based on analytics. Collect live and historic timeseries from your equipment or 4Subsea sensors with secure accessibility onshore as well as offshore. Transform your data to actionable insight by leveraging standard 4insight dashboards, bespoke project-based dashboards by 4Subsea domain experts, or create your own - 4insight enables you to analyse live datasets and visualise up-to-date results in interactive dashboards that you can share internally or to third parties.

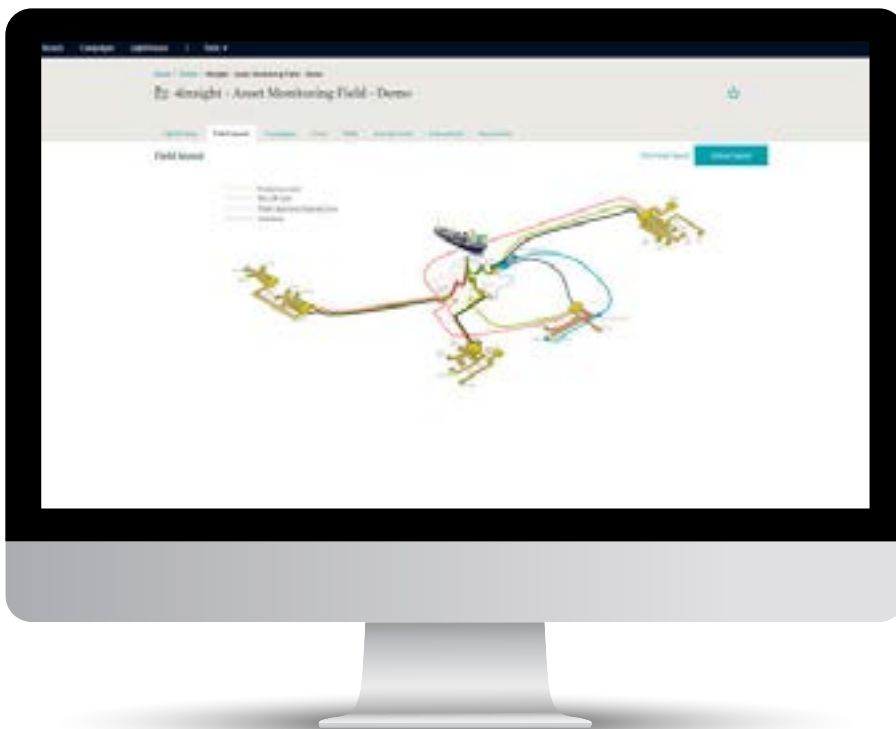

KEY BENEFITS

- Easy access to a unified and quality-assured set of live and historic equipment data onshore and offshore.
- Continuously transform data into up-to-date actionable insight by running algorithms in the cloud.
- Safely share decision support to clients in live, interactive dashboards.
- Work efficiently with data with our open-sourced domain-specific Python packages.
- Join and expand our extensive partner eco-system by leveraging our connectors and APIs.
- Domain-specific applications and bespoke engineering evaluations can provide.

DIGITAL TWIN

4insight® enables you to take proactive rather than reactive decisions by providing an overview of the current and predicted integrity of your assets and operational performance.

DATA-DRIVEN DECISION SUPPORT

Easy access to quality data sets with tools to continuously create and distribute actionable insights contributes to building a data-driven culture that learn across operations.

4Subsea is a leading provider of technology and services that help operators optimise energy production from subsea oil & gas fields and off-shore wind farms. We combine domain expertise with data analytics and digital services to maximise lifetime of assets, reduce operational cost and optimise future projects through data-driven design.

The company was established in 2007 and clients include the major energy operators as well as the large suppliers of subsea equipment. 4Subsea is headquartered in Asker, Norway with additional offices in Bergen, Kristiansand, Stavanger, Rio de Janeiro, Kraków and Aberdeen. 4Subsea is a company in the Subsea 7 Group.
